Software Engineer | Full-Stack Developer

PROFESSIONAL SUMMARY

Software Engineer focused on AI-driven automation and growth systems, with hands-on experience building pipelines that combine lead enrichment (Apollo, scraping), LLM-based classification, and multi-channel outreach (n8n, WhatsApp agents).

Strong full-stack background (Node.js/NestJS, Python/Django, React/Next.js) delivering production features and freelance projects. Experienced in API integrations, data pipelines, PostgreSQL, and system design (UML, patterns), with Docker and automated testing (PyTest).

TECHNICAL SKILLS

- **Programming:** Python, JavaScript (TypeScript), SQL, Bash, C#, HTML/CSS
- **Backend:** Django, Node.js, NestJS, PostgreSQL, MySQL, REST APIs, WebSockets
- **Frontend:** NextJS, React, TypeScript, React Query, Recharts, responsive design
- **Data Engineering:** ETL pipelines, data transformation, data validation, quality assurance, graph data structures
- **DevOps:** Docker, Git, GitHub Actions, CI/CD pipelines, automated testing (PyTest)
- **Architecture:** System design, UML, design patterns, database modeling
- **Security & Auth:** JWT, OAuth2, HTTPS/SSL, OWASP best practices
- **Standards:** ISO/IATA compliance, regulatory compliance, data governance
- **Methodologies:** Agile (Scrum/Kanban), code reviews, production deployments.
- **Languages:** English (C2-Advanced) - Spanish (C2-Native) - Portuguese (A2-Beginner)
- **AI / LLM:** OpenAI API, local LLMs, prompt engineering, classification pipelines, AI agents

PROFESSIONAL EXPERIENCE

- **Software Engineer - Pergamon Advertising - Remote — Dec 2025 → Present**
Software Engineer focused on end-to-end delivery, from functional analysis and system design to production deployment and monitoring. Specialized in backend development (Node.js/NestJS, PostgreSQL) and scalable architectures for high-impact applications. Leverage AI-driven workflows, LLM integrations, and automation to accelerate development and optimize business processes. Strong emphasis on performance, data integrity, and building reliable systems across the full software lifecycle.
- **Freelance Full Stack Web Developer - Remote — Dec 2021 → Present**
Developed web applications for clients using Django, Node, React Native and React. Built responsive UIs, REST APIs, and implemented user authentication and admin features.
- **Data Network Engineer - Physaflow - Remote — Sep 2025 → April 2026**
Building enterprise-grade ETL pipelines for critical infrastructure network analysis across several global verticals including telecommunications, smart cities, energy grids, and blockchain networks.
Software Engineer delivering end-to-end solutions: analysis, design, backend, frontend, and databases.
- **Full Stack Developer - Afrus Org - Remote — Sep 2025 → Dec 2025** - Developing Front and backend features applying software engineering principles.
- **Software Engineer Intern - Blue Alba LLC - Remote — June 2025 → Sep 2025**
Full SDLC in a 4-person team: designed UML and features, implemented a responsive data-analysis dashboard (React + Recharts) and APIs, containerized with Docker, and managed PostgreSQL migrations and tests.
- **1 Hotel / Boucher Brothers – Miami Beach, USA - Beach Attendant & Cashier – Dec 2023 to Mar 2024 and Dec 2024 to Mar 2025**

EDUCATION

- **Universidad Empresarial Siglo 21 (UES21), Córdoba, Argentina - Bachelor of Science in Computer Software Engineering – Oct 2025 – Present**
- **Universidad Tecnológica Nacional (UTN), La Plata, Argentina - Bachelor in Information Systems Engineering — 4th year student - 2022 – Oct 2025**
- **Nuestra Señora de Luján, La Plata, Argentina - High School Diploma – Social Sciences - 2016 - 2021**
